

Siemens Review

Siemens Aktiengesellschaft · Berlin and München
Vol. XXXVIII · 1971

Articles which appeared in the Special Issues are marked by asterisks as follows:

"Contributions in the Space Sector" *

"Communications Engineering" **

"X-Ray and Electron Microscopy News"

(Fifth Special Issue) ***

"Remote Data Processing" ****

Index

Automatic Control

- New Methods and Equipment for the Power Supply of Electroplating Plants
Groeneveld, J.; Simon, W. 90

Automation

- Integrated Test System 70 for the Automation of Testing Processes
Kammerer, W.; Mett, G. 177

Batteries

- Battery Charger with Electronic Overcharging Protection
Kuntner, M. 569

Building Services

- Air-Conditioning Equipment and Its Application
Schorlemmer, U. 423

Cables and Wires

- Cable Insulation Materials with a Base of Ethylene-Propylene-Terpolymer Rubber (EPDM)
Düßel, K.; Schillmöller, A. 226

- Carrier-Frequency Cables for Long-Range Communications
Haumaier, J.; Keil, H. (also **88) 494

- Carrier Television Program Transmission over Coaxial Cables
Guttenberg, W. v.; Kügler, E.; Stegmeier, A. **124

- Fault Location in Carrier Cable Routes with Underground Repeaters
Braun, E.; Mehner, M.; Ziegler, A. **99

- Operating Experience with Carrier Route Equipment for Coaxial Cables
Kügler, E.; Mehner, M. **121

- Sealing the Ends of Communications Conduit Cables for Transportation and Laying
Schleyer, J. 19

- Sealing the Ends of Polyethylene-Sheathed Communications Cables at Storage Depots and in the Field
Scharnagl, Th. 22

Carrier Systems

- Carrier Supply for Frequency-Division Multiplex Equipment
Kupka, K.; Plügge, H. 199

- Carrier Supply for Frequency Multiplex Facilities
Kupka, K.; Plügge, H. **44

- Carrier System Z1T Uses a Single Telephone line to Connect Two Mutually Independent Subscribers to Exchange
Reiter, G.; Stummer, B. 535

- Carrier Telephone System V 60/V 120 for Balanced Cable Lines
Braun, E.; Junghardt, H. **79

- Channel Modem with Electromechanical Filters
Kopp, H.; Mehr, A. 297

- Fundamentals on Carrier Route Equipment for Wideband Cable Systems
Barthel, K.; Köhler, K. **83

- Mastergroup and Supermaster Group Modems
Anders, A.; Junghardt, H. **41

- Microwave Carrier Supply for Wideband Radio Relay Systems
Steinkamp, J. **148

- Modular Carrier System for Small Voice Circuit Blocks
Arends, M.; Fütterer, H.-G.; Kranz, G. **72

- New Carrier Line Traps and Tuning Devices
Held, W.; Pollmeier, F. J. 132

- Power-Feeding Facilities for Main Carrier Repeater Stations of Coaxial Cable Routes
Knesewitch, J.; Ziegler, A. **118

- Power-Feeding of the Underground Carrier-Frequency Repeaters of Wideband Cable Systems
Braun, E.; Mehner, M.; Peters, W. **96

- Carrier Route Pilot Facilities for Wideband Cable Routes
Keil, H.; Mehner, M. **111

- Underground Carrier-Frequency Repeaters V 300 to V 10800 and Their Containers
Koppehele, F.; Kußmaul, P.; Schöber, G. **91

Chemical Industry

- SIMATIC Control and Alarm Equipment in a Methanol Plant
Meier, G.; Spindler, A. 151

Communications

- Baseband Equipment and Echo Suppressors for Satellite Communications Links
Kopp, H. *57

- Carrier-Frequency Cables for Long-Range Communications
Haumaier, J.; Keil, H. (also **88) 494

- Carrier Supply for Frequency-Division Multiplex Equipment
Kupka, K.; Plügge, H. (also **44) 199

Carrier Television Program Transmission over Coaxial Cables Guttenberg, W. v.; Kügler, E.; Stegmeier, A.	**124	Microwave Tube Developments at Siemens Heynisch, H.	483
Channel Filters for Wideband Radio Relay Systems Deutsch, J.; Künemund, F.	**150	Modem Equipment of Wideband Radio Relay Systems Barth, H.; Gabler, E.; Ulmer, W.	**138
Channel Modems Götz, G.; Koob, E.; Laufer, A.	**30	Modular Carrier System for Small Voice Circuit Blocks Arends, M.; Fütterer, H.-G.; Kranz, G.	**72
Communications Satellites Herz, R.; John, R.	51	New Carrier Line Traps and Tuning Devices Held, W.; Pollmeier, F. J.	132
Communications Satellites, Research Satellites and Space Probes Herz, R.; John, R.	*64	Operating Experience with Carrier Route Equipment for Coaxial Cables Kügler, E.; Mehner, M.	**121
Communications Systems for Wire and Radio Paths Poschenrieder, W.; Zitzmann, W. (also **8)	490	Outband Signaling for Telephone Switching Signals Dohrer, M.	**55
Concept for the Design of Communications Equipment Haas, F.; Henke, O.; Mehr, A.	**12	Overvoltage Protection for Coaxial Carrier Lines Underground Repeaters Popp, E.	**102
Control Procedures for Data Communication Systems Fick, H.; Schwarz, J.	****132	PCM 30/32, a Time-Division Multiplex Transmission System for Local and Short-Haul Networks Christiansen, H.-M.; Senft, R. (also **190)	195
Data Communication in Present-Day and Future Communication Networks Rosenhaupt, F.	****15	Planning Fundamentals for Radio Relay Systems and Radio Relay Routes Brodhage, H.	**135
Development Trends in Communications Holzwarth, H.	**6	Power-Feeding Facilities for Main Carrier Repeater Stations of Coaxial Cable Routes Knesewitsch, J.; Ziegler, A.	**118
Development Trends in the Instrumentation Field for Communications Engineering Buchta, K.; Niedereder, M.	**204	Power-Feeding of the Underground Carrier-Frequency Repeaters of Wideband Cable Systems Braun, E.; Mehner, M.; Peters, W.	**96
ELMUX 1000, a New ARQ Multiplex Terminal for Radio Telegraph Transmission Paetsch, W.; Vogt, W.	312	Power Supply Equipment for Carrier-Frequency Facilities Ganzer, E.; Knesewitsch, J.	**69
Equalization and Level Stabilization on Wideband Cable Routes Braun, E.; Keil, H.; Kußmaul, P.	**113	Power Supply Systems for Communications Stations Ganzer, E.; Sammler, K.	**210
Facilities for Service Channels and Additional Channels in Wideband Radio Relay Systems Panschar, H.	**157	Power Supply Equipment for Radio Relay Facilities Eilken, H.; Ganzer, E.; Knesewitsch, J.	**163
Fault Location in Carrier Cable Routes with Underground Repeaters Braun, E.; Mehner, M.; Ziegler, A.	**99	Present and Future Instruments for Communications Systems Niedereder, M.	363
FB 40, a Flexible RC/S System for Communications Networks Herkert, H.; Linow, H.	460	Production and Quality Control of Communications Equipment Haensel, Ch.; Schmitt, O.	**19
FM 200, a Mobile Radio Relay System for 24 Voice Channels Brusch, J.; Gammel, J.	203	Protection Changeover, Diversity Operation and Dropping in Radio Relay Systems Jung, M.; Panschar, H.	**158
FuG 100, a Shortwave Transmitter/Receiver Unit for Mobile Uses Baur, E.; Buchwitz, R.; Zirwas, J.-G.	404	Pulse Code Modulation Kersten, R.	**186
Fundamentals on Carrier Route Equipment for Wideband Cable Systems Barthel, K.; Köhler, K.	**83	Radio Relay Antennas for Narrow RF Bands Döhr, P.; Gillitzer, E.	**177
Fundamentals on Radio Relay Engineering Kienlin, U. v.; Köhler, K.	**133	Radio Relay Antenna Systems for Wide RF Bands Döhr, P.; Gillitzer, E.	**153
Group Modems Stadlthanner, M.; Volejnik, W.	**35	Radio Relay Systems for 3 to 24 Voice Circuits Gammel, J.	**172
Improved Methods for Measurements on Radio Relay Systems Ebisch, M.; Fink, H.	366	Repeater Stations Above Ground for the Carrier Systems V300 to V10800 Keil, H.; Mehner, M.; Stegmeier, A.	**105
Mastergroup and Supermaster Group Modems Anders, A.; Junghardt, H.	**41	Route Pilot Facilities for Wideband Cable Routes Keil, H.; Mehner, M.	**111
Microwave Carrier Supply for Wideband Radio Relay Systems Steinkamp, J.	**148	Sealing the Ends of Communications Conduit Cables for Transportation and Laying Schleyer, J.	19

Sealing the Ends of Polyethylene-Sheathed Communications Cables at Storage Depots and in the Field Scharnagl, Th.	22
Shortwave Communication Links Braun, G.	**179
Stereophonic and Monophonic Carrier Program Transmission in 15-kHz Channels Guttenberg, W. v.; Keller, Ch.	**63
Supergroup Modems Ey, K.; Steiner, E.	**37
Supervisory and Regulating Facilities for Basic Groups and Basic Supergroups Gauß, M.; Timmermann, U.	**58
Supervisory Control in Long-Range Communications Networks Glünder, G.; Meyer, J.	**199
Switching Centers in Telegraph and Data Networks Graf, W.	****21
Television Characteristics and Applications of the Traveling-Wave Klystrons YK 1170 and YK 1180 Heynisch, H.	570
Through-Connection of Standardized Channel Groups Lahmer, H.-J.; Matthes, H.	**51
Transmission Facilities in International and National Communications Krohn, R.	**25
Transmitters and Receivers of Wideband Radio Relay Systems Abel, K.; Peterknecht, K.; Seibt, E.	**142
Underground Carrier-Frequency Repeaters V 300 to V 10800 and Their Containers Koppehele, F.; Kußmaul, P.; Schöber, G.	**91
Voice-Frequency Facilities for Long-Range Communications Auer, W.; Bendel, H.	**196
Wideband Radio Relay Systems – Configurations, Parameters, Measurement Results Enke, H.-G.; Kühne, R.; Seibt, E. (also **166)	497

Components

A Range of Direct-Coupled D.C. Instrumentation Amplifiers Hausen, D.; Sima, H.	464
Breakdown Field Strength of Thin Insulating Oil Films in MKV Capacitors Preißinger, H.	235
Channel Modems Götz, G.; Koob, E.; Laufer, A.	**30
Degaussing Circuits with PTC Resistors Löbl, H.; Roßgotterer, R.	520
Development of Components for Spacecraft Henninger, P. (also *138)	264
Drivers and Power Amplifiers for Earth Stations Graf, H.	*54
Electromechanical Components for Electronic Equipment Scheffold, W.	470
Electron Tubes for Satellites, Space Probes and Earth Stations Pöbl, K.; Prommer, A. (also *149)	7
Filters for Satellites and Space Probes Künemund, F.	*78

GDQ 106, an LSI MOSFET Memory Unit Kantz, D.; Mitterer, R.	327
High-Voltage Capacitor Banks and their Protective Equipment Reizuch, H.	84
Low-Noise Preamplifiers for Earth Stations Garbrecht, K.; Roth, D.	*48
Microwave Power Triodes YD 1380, YD 1381 for Space Applications and Airborne Navigation Equipment Schneider, W.	410
Microwave Tube Developments at Siemens Heynisch, H.	483
PNP Planar Epitaxial Silicon Transistors Arlt, M.; Gückel, H.	139
Present and Future Instruments for Communications Systems Niedereder, M.	363
Relays – Present Status and Future Prospects Schnierl, H.	467
Reliability of Space Components and its Assurance Deixler, A.; Eitzrodt, A.	*154
Selenium Surge Suppressors for the Protection of Voltage-Sensitive Components Eggert, H.	128
Solar Cells and Modules Hofmeister, E.; Nitsche, E.	*90
Solid-State Transducers for Remote Power Metering Günzel, K.; Spiesberger, G.	356
Telecommand Transmitter for Ground Support Stations Kanberg, H.; Prost, H.	*112
Television Characteristics and Applications of the Traveling-Wave Klystrons YK 1170 and YK 1180 Heynisch, H.	570
Tunnel Diode Amplifiers for Satellite Communications Niemeyer, M.	*84
TX CO1, a 6A Triac Kirschner, F.; Krockow, D.	379
Video Transistors Rated for a High Breakdown Voltage Dathe, J.; Schrenk, H.	136

Computers

Analogue Input Devices for Process Computers of the Siemens System 300 Breunig, H.; Pitsch, W.	339
Central Units Incorporating a Computer of the Siemens System 300 for the Integrated Test System 70 Ploß, R.	182
Central Unit Incorporating a Siemens 101 Computer for the Integrated Test System 70 Fischer, M.	186
Computer-Aided Design of Street Lighting Installations Pusch, R.	538
Computer Control of a Coke-Fired Vertical Lime Kiln Fischbach, H.-P.; Kampke, H.	80
Data Display Terminals for Connection to Process Computers Lang, H.; Mentzel, H.-J. (also *118)	104
PCM Simulator for PCM Frames of Arbitrary Format Künkel, G.; Schröder, W.	*125

Process Computer for Mix Preparation in the Porcelain Industry Altmann, H.-F.; Schmiedgen, G.	14	Control Procedures for Data Communication Systems Fick, H.; Schwarz, J.	****132
Process Computers in Educational Establishments Zander, W.	99	Data Communication in Present-Day and Future Communication Networks Rosenhaupt, F.	****15
Process Computers in the Robert Bosch GmbH Technical Centre for Automobile Electrics Jung, H.	348	Data Display Terminals for Connection to Process Computers Lang, H.; Mentzel, H.-J. (also *118)	104
Process Computer Tests Electricity Meters Müller, H.	343	Data Networks – System Parameters and Basic Planning Data Ertel, M.; Vollmeyer, W.	****11
Siemens System 404/6 Used for Computer-Controlled Collection, Distribution and Switching of Data Pusch, R.	****42	Data Protection During Collection, Transmission and Output Operations Kraushaar, R.; Vollmeyer, W.	****25
The Use of Process Computers in the Azur Space Project Bernards, P.; Zander, W.	*114	Data Terminals – Characteristics and Types Biederstedt, U.	****86
Control Equipment		Data Terminals for Batch Transmission Metzger, H.; Obermeier, F.	****94
Control Gear for Air-Conditioning Equipment Horn, K.; Weber, F.	426	Data Terminals for Booking and Accounting Systems Kensy, C.-D.; Mohr, W.	****98
Control of Large Antennas at Earth Stations Lopau, H.; Vollnhals, F.	*39	Data Terminals for Information Systems Rauch, W.; Thiele, G.	****105
Control System for Twin-Crane Handling of Containers Braun, R.; Zimmermann, W.	76	Electronic Memorizing Counters in Meter-Reading Logging Systems Amberg, H.-U.; Willin-Fuhrmann, H.	280
Conveyor and Process Control in Electroplating Plants Götz, G.F.; Reitz, K.H.	456	Frame Synchronizer for Signal Regeneration Barilla, W.; Just, G.	*127
Electronic ROTOSYN Systems Lieb, E.	73	Measuring Technique for Digital Transmission in Telephone and Data Networks Emberger, E.; Schenk, E.	****80
Shaft Encoders with Hall-Generator Sensing Elements Brünnler, W.; Dorsch, G.; Wagnerberger, W.	421	Mechanical and Electronic Modules for Data Terminals Butzke, F.	****90
SIMATIC Control and Alarm Equipment in a Methanol Plant Meier, G.; Spindler, A.	151	Modems for Parallel Transmission of Data within Automatic Telephone Networks Fischer, G.; Grunow, D.	****73
Conveying and Hoisting Equipment		Modems for Serial Transmission of Data over Telephone Circuits Bacher, W.	****67
Control System for Twin-Crane Handling of Containers Braun, R.; Zimmermann, W.	76	PABX's in Data Systems Fahrenschon, F.; Strobelt, W.	****55
Conveyor and Process Control in Electroplating Plants Götz, G.F.; Reitz, K.H.	456	Planning a Private Data Network Jakob, L.	****30
D.C. Drives with Thyristor Converters in Shipyard Crane Installations Trautnitz, W.	508	Problems Concerning the Power Supply of Data Processing Centers Bernt, G.	231
Data Processing		Protected Data Transmission for Rocket Launching Dierza, G.	*129
Analogue Input Devices for Process Computers of the Siemens System 300 Breunig, H.; Pitsch, W.	339	Purpose and General Problems of the Telephone Used as a Terminal in Data Processing Systems Bininda, N.; Schwartzel, H.	271
A Synchronous Machine Stability Program for the Siemens 4004 System Chandrasekaran, A.; Edelmann, H.	352	Remote Data Processing Görling, H.; Rupp, K.	****4
Automation of Data Collection in X-Ray Crystallography by means of the Hoppe Automatic Single Diffractometer AED and the Siemens Process Computer Englmeier, H.P.	***30	Short-Range DC Data Transmission System for Speeds up to 9600 bits/s Franke, H.; Gieck, R.	318
Central Facilities for Remote Data Processing with Siemens Systems 4004 and 404/6 Evers, H.; Obst, F.	****112	Siemens System 404/6 Used for Computer-Controlled Collection, Distribution and Switching of Data Pusch, R.	****42
Concentrators – Economic Switching Systems for Special Data Networks Franz, D.	****49	Signal Processing when Using a Computer in Electrocardiography Riedl, H.	300
Connecting Data Networks to EDP Systems Mierniec, H.	****126		

Switching Centers for General-Purpose Switched Data Networks Krämer, R.	****37	Electronics Electromechanical Components for Electronic Equipment Scheffold, W.	470
Switching Centers in Telegraph and Data Networks Graf, W.	****21	Optoelectronic Devices Hatzinger, G.	558
System Programs for Remote Data Processing Jilek, P.; Feltl, H.	****120	Reliability of Space Components and its Assurance Deixler, A.; Etzrodt, A.	*154
Telegraph-Type Transmission Facilities for Data Networks Reger, W.	****62	Solid-State Transducers for Remote Power Metering Günzel, K.; Spiesberger, G.	356
Electrical Machines A New Range of Unitized Machines Lang, K.; Voigtländer, G.	218	Electrophoresis Electrocoating Plants with Digitally Controlled Elevators Berger, S.; Schwindt, H.	157
Application and Further Development of Converter-Fed-Synchronous Motors with Self-Control Haböck, A.; Köllensperger, D.	393	Generators/Generating Sets The 95-MVA Surge-Power Motor-Generator Set for the Main Ring Magnets of the 28 GeV CERN Proton Synchrotron at Geneva Dressel, O.; Groß, S.; Müller, H.	542
A Synchronous Machine Stability Program for the Siemens 4004 System Chandrasekaran, A.; Edelmann, H.	352	Highway Traffic Control Influence of Traffic Signal Systems on the Accident Rate and Danger Rating of Road Intersections Mensebach, W.	142
PROTOFER Magnetic Slot Seals for Electrical Machines Keuth, H.	222	Lane-Direction Traffic Signal Control Along Berlin Highway Habermann, G.; Schönleiter, J.	531
The Design of A.C.-Controller-Fed Induction Machines for Brushless Variable-Speed Drives Gutt, H.-J.	40	Insulation/Insulators Breakdown Field Strength of Thin Insulating Oil Films in MKV Capacitors Preißinger, H.	235
Single/Three-Phase Universal Machine for Training Purposes Scholler, P.	516	Cable Insulation Materials with a Base of Ethylene-Propylene-Terpolymer Rubber (EPDM) Düßel, K.; Schillmöller, A.	226
State of Development of Converter-Fed Synchronous Motors with Self-Control Haböck, A.; Köllensperger, D.	390	New Test Apparatus for Determining the Gas Absorption of Insulating Oil under Electrical Stress Linke, G.	553
Electricity Meters Electronic Memorizing Counters in Meter-Reading Logging Systems Amberg, H.-U.; Willin-Fuhrmann, H.	280	Iron and Steel Works Compact-Type D.C. Mill Motors of Medium Ratings Kmelisch, W.	36
Process Computer Tests Electricity Meters Müller, H.	343	D.C. Drives for Ring Rolling Mills Emilius, E.	68
Electroacoustic Equipment Electroacoustic Equipment in the German Federal Constitutional Court Wagner, D.	526	Laboratories A Control and Drive Model for Demonstration Purposes in Drive Engineering Palme, K.	518
Electro-Acoustic Equipment in the New High-Rise Office Building of the German Bundestag Brinkmann, H.; Schneider, E.	189	A New Power Supply System for the Main Ring Magnets of the 28-GeV CERN Proton Synchrotron at Geneva Vau, G.	247
EUROPHON Studio Loudspeaker Assembly Kammerer, E.	114	More Power for Testing High-Voltage Switchgear Pflaum, E.	44
The Audio-Visual Facilities in Langensteinbacherhöhe Special Hospital near Karlsruhe Harcher, W.; Kammerer, P.; Wagner, D.	31	New Power Supply Equipment in the Improvement Programme for the 28-GeV CERN Proton Synchrotron at Geneva Stirba, A.; Vau, G.	243
Electromedical Engineering Dental X-Ray Unit with Electronic Exposure Timer Braun, E.; Schäfer, G.	308	Single/Three-Phase Universal Machine for Training Purposes Scholler, P.	516
X-Ray Examination Unit ORBISKOP with Electronic Control Schwesig, H.	109		
Signal Processing when Using a Computer in Electrocardiography Riedl, H.	300		

Lasers and Masers

- Laser Beam Displays Satellite Orbit
Brodkorb, J. (also *120) 107

- The Laser Interferometer, a Device for Measuring
and Adjusting Machine Tools
Hock, F.; Kindl, H.; Latzin, W.; Sautter, G. 123

Lighting

- Computer-Aided Design of Street Lighting Installations
Pusch, R. 538

- Modular Control with a Future
Look for Tunnel Lightning
Lucke, H. 476

Machine Tools

- Continuous Copying for Lathes
Bock, L. 450

- Feed Drives with High Dynamic Performance
for Machine Tools
Eberle, M.; Spingler, H. 447

- SINUMERIK 500 System of Numerical Controls
Baisch, R.; Klinge, R.; Wiehn, P. 291

- The Laser Interferometer, a Device for Measuring
and Adjusting Machine Tools
Hock, F.; Kindl, H.; Latzin, W.; Sautter, G. 123

- Thyristor-Controlled Main Drives for Machine Tools
Reihs, R. 119

Measuring Equipment

- A Range of Direct-Coupled D.C. Instrumentation Amplifiers
Hausen, D.; Sima, H. 464

- Development Trends in the Instrumentation Field
for Communications Engineering
Buchta, K.; Niedereder, M. **204

- New Pulse Recorders
Knöller, Ph.M. 418

- OSCILLAR M07105 - a 50-MHz Cathode-Ray
Oscilloscope with Plug-In Modules
Baier, H. 415

- TELEPNEU Continuous-Line Recorder
of Compact Design
Dreixler, E.; Pfitzner, U. 556

- Voltage-Frequency Conversion in Measurements
on Telephone Lines
Urschlechter, H. 208

Miscellaneous

- Electrical Equipment of the Erlangen Lock
on the Rhine-Main-Danube Canal (Europa Canal)
Posch, M. 435

- Equipment for Monitoring the Permeability
of the Sylvenstein Dam
Diwok, J. 369

- Foundations with Injection Anchors
for Overhead-Line Towers
Stotz, W. 549

- SIFERRIT N32, a New Soft-Magnetic Material
for a Broad Temperature Range
Röß, W.; Wernet, S. 523

- Time Stability of Capacitance
of Twin Polystyrene Capacitors
Zwiesler, W. 563

Motors

- A New Range of Unitized Machines
Lang, K.; Voigtländer, G. 218

- Application and Further Development
of Converter-Fed Synchronous Motors with Self-Control
Haböck, A.; Köllensperger, D. 393

- Compact-Type D.C. Mill Motors of Medium Ratings
Kmelisch, W. 36

- Converter-Fed D.C. Drives for the Paper Industry
Moisel, P. 440

- Converter-Fed Drives
Waldinger, H. 387

- D.C. Drives for Ring Rolling Mills
Emilius, E. 68

- Drive of a Glass Drawing Plant with High-Accuracy
Analogue Control
Meyer, S.; Prottengeier, E. 443

- Drives for Large Antennas in Earth Stations
Nachtigal, J.; Peters, K. *45

- Electronic Motors for Industrial Applications
Kappius, F.; Liska, M. 453

- Gearless Drive for a Cement Mill
Riehlein, D. 398

- SIMOTRAS Drives for Pumps and Fans of Low Power
Ettner, N. 445

- SIMOTRON Drives for Medium Output Ratings
Ettlinger, G.; Leitgeb, W.; Poppinger, H. 396

- SIMOVERT Single-Motor Drive for Extruders
Held, E.; Klautschek, H.; Schröder, L. 513

- State of Development of Converter-Fed
Synchronous Motors with Self-Control
Haböck, A.; Köllensperger, D. 390

- The Design of A.C.-Controller-Fed Induction Machines
for Brushless Variable-Speed Drives
Gutt, H.-J. 40

- Thyristor-Controlled Main Drives for Machine Tools
Reihs, R. 119

Nuclear Energy

- Nuclear Power Plants for Space Applications
Budnick, D. (also *95) 3

Power Stations

- Waldeck II Pumped-Storage Station under Construction
Wolf, E. 401

Power Supply Systems

- A New Power Supply System for the Main Ring Magnets
of the 28-GeV CERN Proton Synchrotron at Geneva
Vau, G. 247

- New Power Supply Equipment
in the Improvement Programme
for the 28-GeV CERN Proton Synchrotron at Geneva
Stirba, A.; Vau, G. 243

- Power Supply Equipment for Carrier-Frequency Facilities
Ganzer, E.; Knesewitsch, J. **69

Power Supply Equipment for Radio Relay Facilities Eilken, H.; Ganzer, E.; Knesewitsch, J.	**163	Communications Satellites, Research Satellites and Space Probes Herz, R.; John, R.	*64
Power Supplies for Earth Stations Peters, K.	*60	Control of Large Antennas at Earth Stations Lopau, H.; Vollnhals, F.	*39
Power Supply Systems for Communications Stations Ganzer, E.; Sammler, K.	**210	Ground Support Stations for Satellites and Space Probes Koziol, J.; Müller, W.	*104
Problems Concerning the Power Supply of Data Processing Centers Bernt, G.	231	Development of Components for Spacecraft Henninger, P. (also *138)	264
Protective Equipment		Drivers and Power Amplifiers for Earth Stations Graf, H.	*54
Demonstration of Siemens-Type Lightning Arrester 3EA1001 Jakszt, W.	547	Drives for Large Antennas in Earth Stations Nachtigal, J.; Peters, K.	*45
Electronic Distance-Protection System with a Polygonal Tripping Characteristic Zurowski, E.	429	Earth Stations for Satellite Communications Teupser, R.; Weispfenning, H.	*24
High-Voltage Capacitor Banks and their Protective Equipment Reizuch, H.	84	Electron Tubes for Satellites, Space Probes and Earth Stations Pöbl, K.; Prommer, A. (also *149)	7
New Circuit for the Operating Duty Test of Lightning Arresters by means of Long-Duration Currents from a Distributed-Constant Impulse Generator Jakszt, W.	171	Filters for Satellites and Space Probes Künemund, F.	*78
Overvoltage Protection for Coaxial Carrier Lines Underground Repeaters Popp, E.	**102	Frame Synchronizer for Signal Regeneration Barilla, W.; Just, G.	*127
Selenium Surge Suppressors for the Protection of Voltage-Sensitive Components Eggert, H.	128	Laser Beam Displays Satellite Orbit Brodkorb, J. (also *120)	107
Tests on a New Lightning Arrester for Primary Distribution Systems Jakszt, W.; Werner, W.	371	Low-Noise Preamplifiers for Earth Stations Garbrecht, K.; Roth, D.	*48
Rectifiers		Materials and Technologies for Spacecraft Power Generators Rösler, U.	*100
Thyristor Auxiliary Rectifiers for Munich Rapid-Transit System Kuntner, M.; Wasserbauer, H.	333	Microwave Power Triodes YD1380, YD1381 for Space Applications and Airborne Navigation Equipment Schneider, W.	410
Remote Control/Remote Indication Equipment		Mobile System Test Facility for the German Research Satellite Azur Haas, H.; Kölbel, J.; Mett, G.; Zander, W.	*158
FB 40, a Flexible RC/S System for Communications Networks Herkert, H.; Linow, H.	460	Nuclear Power Plants for Space Applications Budnick, D. (also *95)	3
Semiconductors		PCM Simulator for PCM Frames of Arbitrary Format Künkel, G.; Schröder, W.	*125
Semiconductor Devices for Spacecraft Dorendorf, H.; Wiesner, R.	*145	Polarization Converter for Earth Stations, an Example of the Solution of Special Design Problems Schlegel, O.; Schuster, R.	*37
Semiconductor Radiation Detectors in the Research Satellite Azur Glasow, P. (also *81)	12	Power Sources for Hypersonic Wind-Tunnels Burhorn, Fr.	*174
Space Technology		Power Supplies for Earth Stations Peters, K.	*60
Antennas for Satellites and Space Probes Laub, H.	*74	Protected Data Transmission for Rocket Launching Dierza, G.	*129
Autotracking by Large Antennas at Earth Stations Teupser, R.	*33	Radio Interferometer for Ground Support Stations Mahner, H.; Vollnhals, F.	*132
Baseband Equipment and Echo Suppressors for Satellite Communications Links Kopp, H.	*57	Radio-Isotopic Thermoelectric Generator for Space Missions Renner, Th.	*93
Communications Satellites Herz, R.; John, R.	51	Regeneration of PCM Satellite Signals Haeefe, G.; Mett, G.	*122
		Satellite Communications Links Stöhr, W.	*11
		Semiconductor Devices for Spacecraft Dorendorf, H.; Wiesner, R.	*145

Semiconductor Radiation Detectors in the Research Satellite Azur Glasow, P. (also *81) 12	Carrier Telephone System V60/V120 for Balanced Cable Lines Braun, E.; Junghardt, H. **79
Siemens Contributions in the Space Sector Holzwarth, H. *6	Channel Modem with Electromechanical Filters Kopp, H.; Mehr, A. 297
Simulating Space Radiation Pfister, H. *168	Expansion of Asunción's City Telephone Network with Unit-Type PE Cables Rademacher, W. 147
Solar Cells and Modules Hofmeister, E.; Nitsche, E. *90	Large ESK 10000E Telephone Exchange in Hong Kong Nölke, P. 275
System Management in Space Projects Bischoff, G.; Jahn, H. *20	Modems for Parallel Transmission of Data within Automatic Telephone Networks Fischer, G.; Grunow, D. ****73
Telecommand Transmitter for Ground Support Stations Kanberg, H.; Prost, H. *112	Modems for Serial Transmission of Data over Telephone Circuits Bacher, W. ****67
Telemetry and Tracking Receiver for Ground Support Stations Mahner, H. *108	Outband Signaling for Telephone Switching Signals Dohrer, M. **55
